

Automotive

Want to see where you're going? Well, turn on your headlights, but if you want to see maps, dropped french fries (pomme frites to our visitors on the Continent) and other items in a dark car, we are the answer!

And we're not just for automobiles either; Littlites are perfect for motorcycle, RV, and public safety vehicle applications as well.

Our automotive lamp sets are available with a 6, 12 or 18-inch gooseneck and include chassis with dimmer, removable color filter, mounting hardware and storage clip.

L-5 Series

High Intensity lamp with end mount gooseneck. Gooseneck lays flat when not in use.

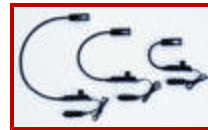

Pictured left to right: L-5/18, L-5/12, L-5/6.

L-6 Series

High Intensity lamp with cigarette adapter included. Can be permanently mounted or attached to an optional mounting accessory for the guy or gal on the go!

Pictured left to right: L-6/18, L-6/12, L-6/6.

L-9 Series

High Intensity lamp with top mount gooseneck. Why not?

Pictured left to right: L-9/18, L-9/12, L-9/6.

L-9/12 LED & L-9/18-LED

Littlite LED lampset for automotive use. Cordset routed through bottom of chassis for flush mounting. Gooseneck attached to top of chassis. Switchable between white and red light output.

L-5/12 LED & L-5/18 LED

Littlite LED lampset for automotive use. Cordset routed through bottom of chassis for flush mounting. Gooseneck attached to end of chassis allows light to lay flat when not in use. Switchable between white and red light output.

L-6/12 LED & L-6/18 LED

Littlite LED lampset for automotive use. Cordset routed out the back of chassis. Gooseneck attached to end of chassis allows light to lay flat when not in use. Included cigarette plug adapter. Switchable between white and red light output.
